

Straightforward Expertise, Protecting your Reputation

Customer Success Story:

Almac

Who We Are

At Hyde Park Environmental, we provide straightforward expertise to help companies manage spills and protect people, property, and the environment. Our mission is clear:

Straightforward Expertise, Protecting your Reputation

We deliver expert advice, tailored solutions, and practical support to ensure our customers meet all regulatory requirements safely and efficiently.

We offer a wide range of products and services, including:

- Spill Kits
- Absorbents
- Containment Systems
- Bunded Storage
- Workplace Safety
- Spill Training

The **Knowledge Hub** offers guides, catalogues, and industry insights to help businesses manage spills safely and stay compliant. Tap the image to explore!

Customer Overview

Company: Almac Group

Location: Almac House, 20 Seagoe Rd, Craigavon BT63 5QD

Overview: Almac Group is a global pharmaceutical services company based in Craigavon. The company supports pharmaceutical and biotechnology firms throughout the drug development process, helping to develop, manufacture, and distribute medicines worldwide.

Products: Almac provides services including drug discovery, pharmaceutical development, clinical trial supply, diagnostics, manufacturing, and global distribution. The company also offers clinical technologies and data solutions to support the safe and efficient delivery of medicines.

Project in Focus

Almac Group required reliable chemical spill response solutions to support safe handling procedures across pharmaceutical manufacturing and laboratory environments. With areas handling solvents, chemicals, and hazardous substances, they needed absorbents capable of quickly containing spills while supporting workplace safety and compliance standards.

Key challenges included:

- Spill Response – Providing fast and effective absorption of hazardous chemical leaks and spills.
- Workplace Safety – Reducing slip hazards and minimising exposure risks for employees handling chemicals.
- Compliance Support – Supporting COSHH and internal safety procedures across operational areas.
- Operational Efficiency – Ensuring spill response products could be deployed quickly with minimal disruption.
- Reliability – Selecting durable absorbents suitable for demanding pharmaceutical and laboratory environments.

Project in Focus

The Solution

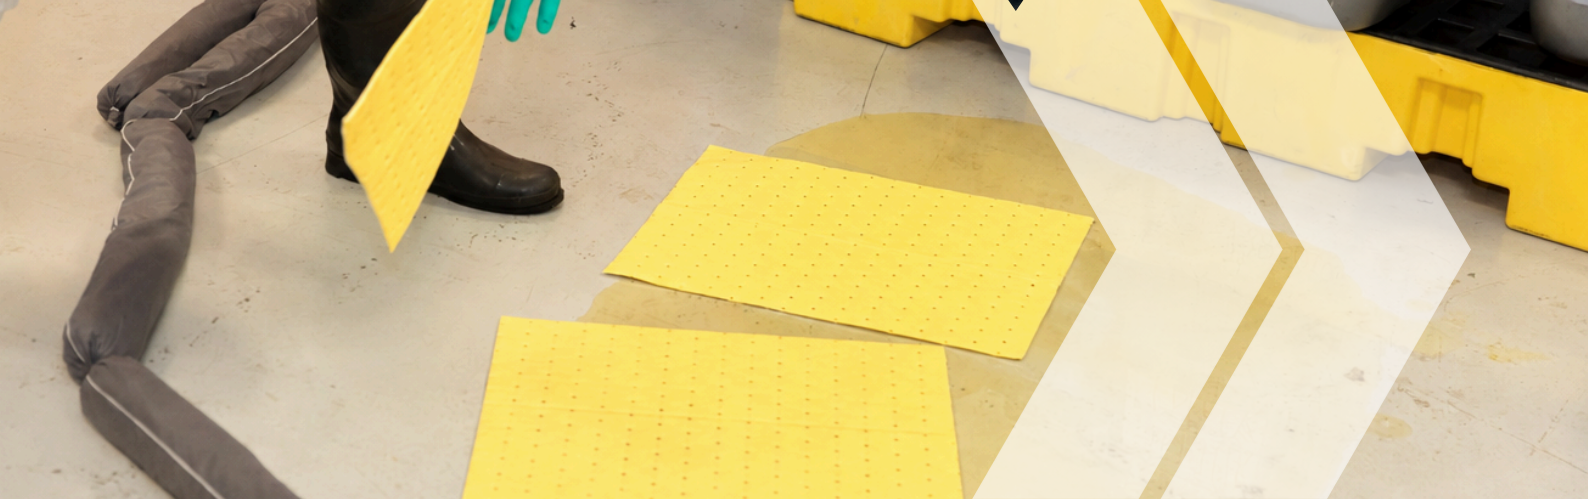

HUG Chemical Heavyweight Pads were introduced across key operational areas to improve the management of hazardous chemical spills within laboratory and pharmaceutical environments. Their heavyweight absorbency and durable design provide fast, reliable spill response, while the highly visible yellow colour supports quick identification during clean-up procedures.

Delivery

HUG Chemical Heavyweight Pads were delivered for use across laboratory, storage, and production areas, providing an effective solution for managing chemical spills while supporting existing safety and compliance procedures.

Outcome

The introduction of HUG Chemical Heavyweight Pads helped strengthen spill response procedures across the site by improving containment of hazardous liquids and reducing workplace risks. The solution also supported operational efficiency by enabling faster clean-up processes while helping maintain high safety and compliance standards.

HUG Chemical Heavyweight Pads

Product Code: HCP146

Details

The HUG Chemical Heavyweight Pads are designed for fast and effective absorption of hazardous chemical spills in industrial environments. Their heavyweight construction provides high absorbency for acids, solvents, coolants, and other aggressive liquids, helping maintain a safe and clean workspace. The bright yellow colour allows for quick identification during spill response, while the durable design performs reliably during larger clean-up tasks. Ideal for chemical plants, laboratories and pharmaceutical sites.
