We offer a wide range of products and services, including:

- Spill Kits
- Absorbents
- Containment Systems
- Bunded Storage
- Workplace Safety
- Spill Training

The **Knowledge Hub** offers guides, catalogues, and industry insights to help businesses manage spills safely and stay compliant. Tap the image to explore!

Customer Overview

Company: Bulmers

Location: Dar Lane, Clonmel, Co. Tipperary

Overview: Bulmers is an Irish cider brand producing a range of traditional and craft ciders from locally sourced apples in Clonmel, County Tipperary. As a heritage beverage company with wide distribution across Ireland, it requires high-quality production processes and sustainable sourcing practices to ensure consistent product quality and brand reputation.

Products: Bulmers' cider range includes Original Irish Cider and Light Cider, available in bottles, cans, and on draught, catering to both retail and on-trade distribution channels.

Project in Focus

Bulmers required compliant safety shower and eyewash units to meet COSHH and Health and Safety at Work Act requirements. With areas handling chemicals and cleaning agents, they needed a solution that would protect staff from hazardous exposure while ensuring rapid and effective emergency decontamination.

Key challenges included:

- Regulatory Compliance – Ensuring all units met health and safety regulations.
- Strategic Placement – Positioning showers and eyewashes effectively in high-risk chemical handling areas.
- Staff Safety – Guaranteeing rapid and reliable access for emergency decontamination.
- Integration – Incorporating the units seamlessly into existing production workflows without disruption.
- Maintenance & Durability – Selecting robust units that require minimal upkeep while providing long-term reliability.

Project in Focus

The Solution

The installation of compliant safety shower and eyewash units provided a safe, effective, and fully compliant solution tailored to Bulmers' production facility and staff safety requirements.

Emergency Safety Showers key benefits:

- Provides immediate emergency decontamination for staff.
- Meets health and safety standards, ensuring regulatory compliance.
- Integrates into production areas without disrupting workflows.

Delivery

Fifteen safety shower and eyewash units were delivered, equipping Bulmers' production facility with compliant emergency decontamination points strategically positioned across high-risk chemical areas to improve accessibility and response times, delivering full regulatory compliance, strengthened safety standards, and enhanced overall efficiency.

Outcome

The delivery and installation of the safety showers provided the facility with fully operational emergency decontamination points, improving staff safety, ensuring rapid response in chemical handling areas, and supporting compliance with the Control of Substances Hazardous to Health Regulations 2002, which state that "where appropriate, suitable and sufficient washing facilities, including emergency showers and eyewash stations, shall be provided," ultimately enhancing operational efficiency and strengthening workplace safety standards.
