

# Purchasing The Correct Spill Kit

**Hyde Park**

**ENVIRONMENTAL**

**HUG**  
control with care

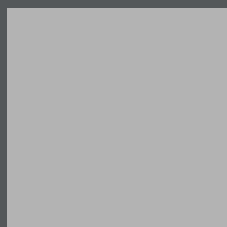

# Things to consider....

**What is the liquid that is at risk of being spilt, or that is needing cleaned up?**

**What volumes of liquid are you storing?**

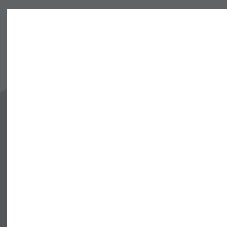

# Spill Kit Colour Guide

The absorbents within each spill kit differ, determined by the liquid that is being absorbed.

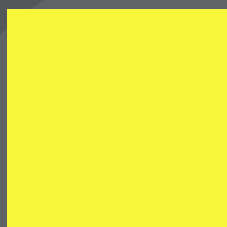

## Maintenance

For emergency response to all non-corrosive liquid spills, including water & oil.

## Oil

For emergency response to hydrocarbons, solvents & other organic liquid spills.

## Chemical

For emergency response to chemicals and hazardous liquid spills.

# Spill Kit Size Guide

The size of the spill kit is determined by the volume of liquid you are absorbing.

Each size of spill kit contains different quantities of absorbent products.

20 Ltr

45 Ltr

125  
Ltr

255  
Ltr

800  
Ltr

1100  
Ltr

e.g 20 Ltr Spill Kit is suitable for absorbing 20Ltrs of spilled liquid.
